LIVEPRO PRESENTS OUR ELITE RACK OFFERING

THE EVEREST 25™ SERIES

SPECIFICATIONS

The Most Versatile Rack on the Market

The Everest25™ is a heavy-duty, highly customizable power rack that you'll never need to upgrade. Built with expansion in mind, not replacement. The rack is tough, made with 75x75 Q235-gauge steel with a 500kg rackable capacity. It has 50mm hole spacing throughout with 25mm pinholes. Laser-cut numbers on every hole makes it easy to line up attachments and set up for your lifts. The Everest25™ series is Livepro's most configurable system, with a robust attachment ecosystem. Add cable attachments, storage attachments, and so much more to build out your rack.

Customize your rack with a variety of height, depth, and color options. Build a half rack, 4-post, or 6-post rack. The configurations and adjustments are endless, limited only by your creativity. Your rack. Your way.

FACILITY DESIGN AND PLANNING

The first step to a new sports performance facility is to understand what we mean by a sports performance facility. Traditionally called a “weight room”, a place where you move weight to get stronger. As training and athletics have evolved the “weight room” has grown into a sports performance facility where teams and athletes hone their skills on the three pillars of sports performance success; physiological, psychological, and sport skills while building your teams culture. The Everest25™ series evolutionary equipment combined with Professional rugby player 10 years of experience can help you design a sports performance facility to help your athletes leave a legacy of winning on and off the field!

STANDARD COLOR OPTIONS

An industry leading number of standard gloss and texture color options are included our services. Custom colors can be created and requested for an additional cost. Click on the colors below for more details.

CUSTOM SIZE

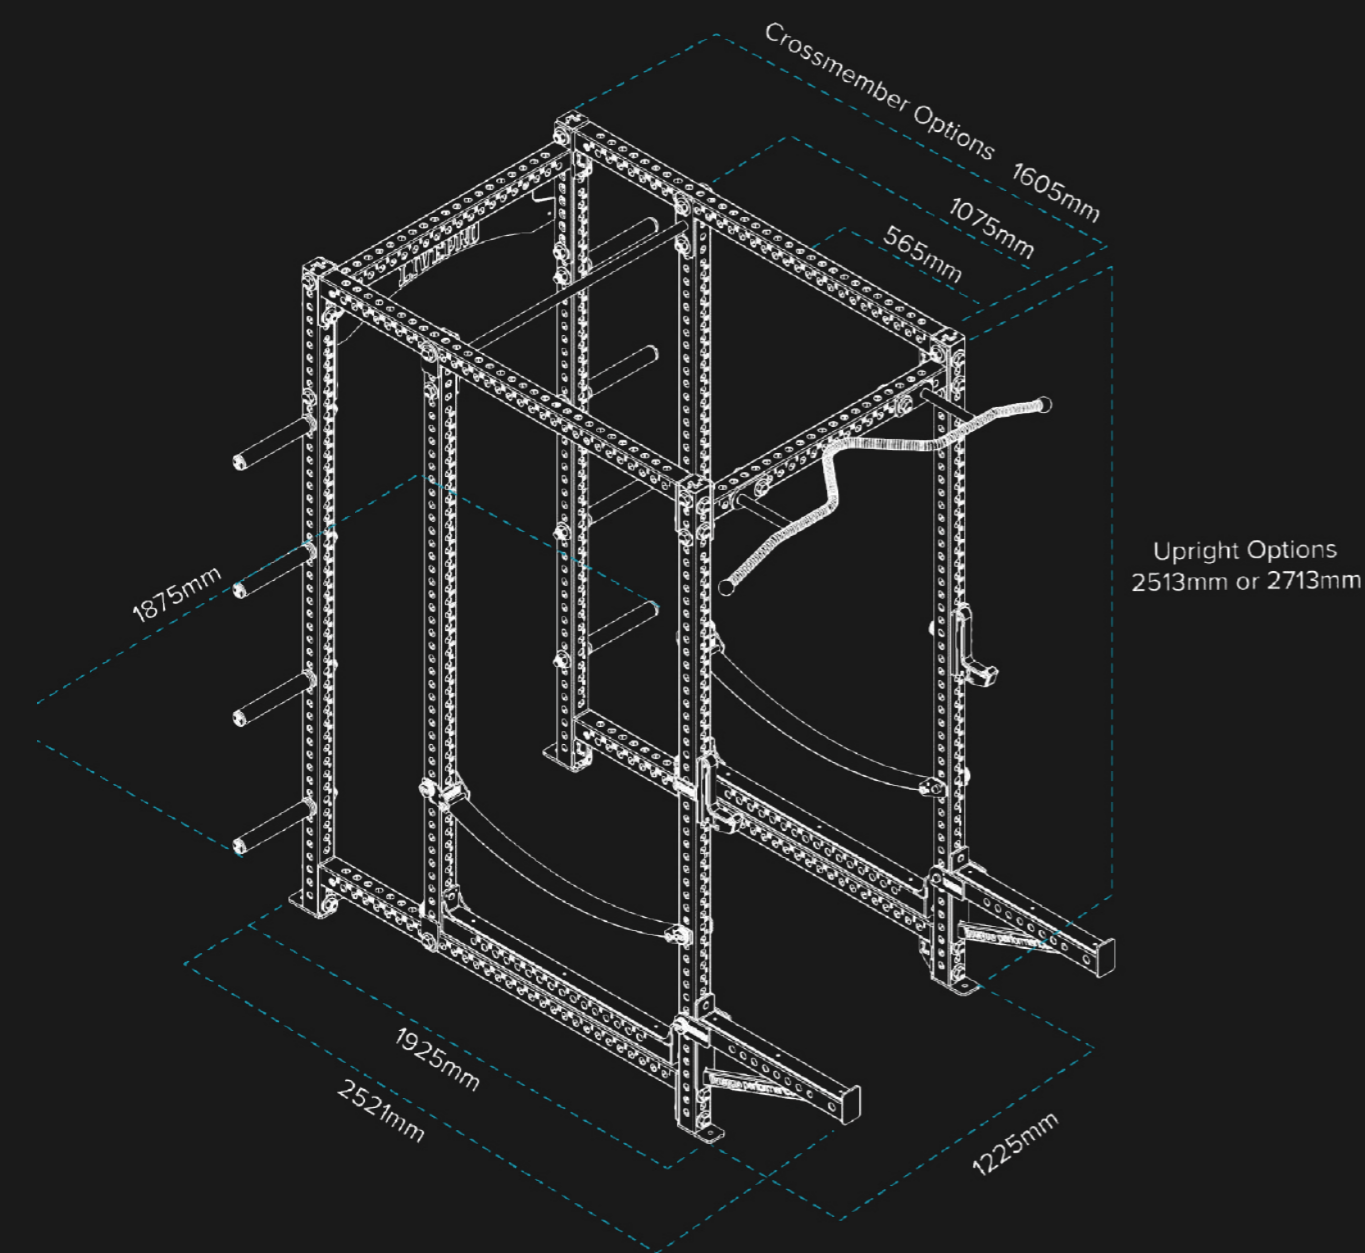

As the original manufacturer of this series, we believe that customers' needs cannot be foreseen in advance. Therefore, it is also possible to completely customize or even partially customize parts. For example, if you need a higher post or a shorter pull rod. Or anything innovative that you might invent. We will draw your customized product from scratch to meet your requirements.

RACK LASER CUT LOGO

Our Logo Beam Connector Crossbmer has pre drilled holes to add laser cut rectangle with words in the center and two hexagons on each side for logos. Laser Cut logos can be added after purchasing a rack as an add on.

BENCH & PLATFORM

ADJUSTABLE BENCH

- **Material:** steel+PU+sponge+recycled cotton
- **Size:** 99×66×140cm
- **Weight:** 36kg
- **Assembly required**

PRO ADJUSTABLE BENCH

- **Size:** 138×68.6×44.5(cm)
- **Weight:** 200kg
- **Tube size:** 50×80×2.5mm
- **Cushion adjustment angle:** 0°, 20°
- **Backrest adjustment angle:** 0°, 15°, 30°, 45°, 60°, 75°
- **Assembly required**

FLAT STOOL

- **Product size:** 121.5×67×49.5(cm)
- **Cushion size:** 120×32×7(cm)
- **Weight:** 34.8kg
- **Material:** PVC+Steel
- **Assembly required**

LIVEPRO DONKEY

- Made of high-quality steel pipe
- The bottom 7-position adjustment lever can adjust the flexion angle to meet any exercise needs
- Comfortable cushion
- Height adjustment

- **Size:** 180L×91W×139H(cm)
- **Assembly required**

SINGLE LEG SQUAT

This single leg squat rack has an ergonomic design.13 height-adjustable holes and a swivel foam footrest keep your feet firmly on the curve.Made of high quality steel, strong and durable.The adjustable single-leg squat rack allows students to comfortably perform single-leg exercises such as the single-leg bench squats, Bulgarian splits, and rear-foot over-head splits.

- Made of high-quality steel pipe
- There are a total of 13 height adjustment holes with a spacing of 2.5cm
- Comfortable foot rest

- **Size:** 53×58×58cm
- **Weight:** 14.5kg
- **Assembly required**

LIFTING PLATFORM FOR POWER RACK

The Lifting Platform for Power Rack features our (40/80)mm thick High-Impact Gym Tiles and the appropriate beveled edge tiles, including connection push-pins, for a walk-in ramp. The beveled edge is also an important feature to comply with UK health and safety regulations. Proving a cost-effective option for home gyms and commercial gyms, these lifting platforms feel good underfoot and prove great at absorbing impact.

- 40/80mm for cushion height
- Durable solid rubber discharge plates with shock absorption system
- Massive multiplex board with non-slip surface sealing
- Abrasion-resistant, insensitive to dirt, water-repellent
- Robust steel frame made of thick-walled square steel tube
- High stress level + up to 500 kg
- With shock absorption system
- Platform is delivered disassembled
- Quick and easy assembly, including assembly instructions
- Custom logo option

Item	Platform board size	Embedded board size	Thickness
LP6032	2580×2080mm	1100×1550mm	40mm

WEIGHTLIFTING PLATFORM

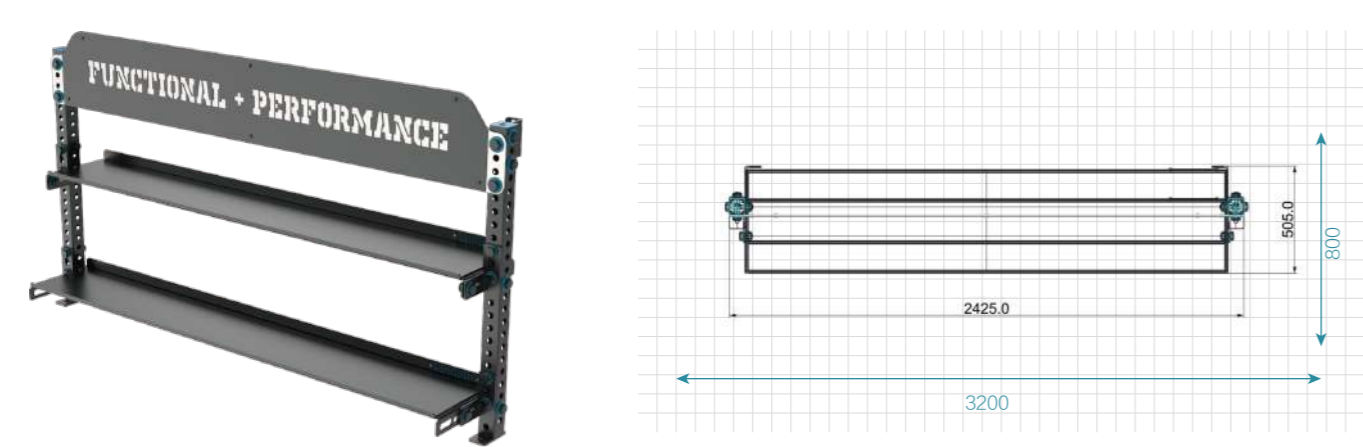

The largest weight-bearing platform designed for weightlifting and powerlifting, there are two options for cushioning thickness, 40 and 80mm. The left and right rubber cushioning pads are of a single-piece structure, and the bottom is recycled cotton, which provides stronger cushioning and stronger noise reduction. The combat area is composed of a 40mm/80mm thick non-slip multi-functional platform. The heavier weight and special treatment on the surface make the entire platform more non-slip.

- 40/80mm cushioning thickness
- Durable rubber provides ample cushioning for the landing of the bell plate.
- Huge multifunctional platform provides anti-slip protection.
- Abrasion-resistant, dirt-resistant, water-resistant
- High strength iron frame
- Can bear more than 500kg
- Easy to assemble, with clear and easy-to-understand assembly instructions
- Customizable LOGO

Item	Size	Thickness
LP6033	2580×2080mm	40mm

CUSTOM STORAGE RACK

This is a simple and straightforward solution for storing kettlebells, providing a good storage bracket for kettlebells in the gym. It reduces the floor area, and the kettlebells are neatly stored, making the space even larger. It is made of 11-gauge steel material, which is more stable as a whole. The metal frame is sturdy and durable, beautiful and atmospheric, making it a very good choice.

- Material:11-gauge steel
- Hole size:26mm
- Hole Spacing:50mm

FEATURES:

- 1.Modular configuration and future expandability
- 2.Interchangeable,quick-change shelving system
- 3.Freedom mount technology
- 4.Custom color

As a new addition to our storage collection, we are introducing this dumbbell rack. It can hold 10 pairs of dumbbells and is made of 11 # steel cutting, ensuring overall stability. Excellent load-bearing capacity, beautiful and atmospheric black metal frame, very suitable for use in advanced gyms. The adjustment holes on the column are used to adjust the height and angle of the tray, and can be adjusted as needed. The pole storage design details on the base have a significant impact. Greatly saves space, making the free force zone cleaner and more orderly.

YANGTZE™ (WORK CAPACITY) RACK

OUR ADVANTAGES

Outdoor use

Starting to develop Yangtze River series products, our research and development team also thought of those who need to set up workstations outdoors, even without shielding. When installing Changjiang series products outdoors, all steel components are installed first Galvanizing followed by powder coating upgrades. This unique process, coupled with special drainage holes drilled on the main pillars of the power station, makes it completely rustproof and can withstand various outdoor factors.

Custom Colors

Even if the standard color of the parts is "black" as described above, customers can customize their own colors for the entire equipment or even some parts (such as columns).

Custom size

As the original manufacturer of this series, we believe that customers' needs cannot be foreseen in advance. Therefore, it is also possible to completely customize or even partially customize parts. For example, if you need a higher post or a shorter pull rod. Or anything innovative that you might invent. We will draw your customized product from scratch to meet your requirements.

LP6016 CLIMBING POWER RACK

FUNCTIONAL
OCCUPANCY
12
USERS

Compared to other training racks, we have many advantages.First, many accessories can be installed. Including: J-hook, positioning arm, suspension trainer, lower link, rope, etc.This brings unlimited training possibilities.Our modular design allows you to start from one training stand and splice other training stands together.The old training rack also does not need to be replaced, which saves time and money.Finally, it can be fixed to the floor.Maximize the use of your floor space.

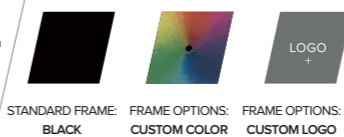

Contain:

1. 270cm main column x8
2. 360cm main column x4
3. 180cm horizontal bar x22
4. 110cm inclined connecting arm x4
5. 180cm connecting arm x6
6. 180cm reinforced horizontal bar x2
7. J-shaped hook x8

YANGTZE™ TRAINING BOX

Outdoor training solution - training box. Ready to use.

SAFETY FIRST!

We always remember the importance of safety, even in outdoor gyms. These containers are brand new, unused and have good structural characteristics. This cannot be guaranteed for containers that have been used for many years, because no one knows what environment and use they were in.

If the outdoor gym must be installed in a public place. The certification shall be carried out according to the strict regulations on the safety of public training equipment installed in public places.

All containers used for the construction of the stadium are in accordance with international ISO standards.

Collaborative Design

Our product team experts will work with you to understand the model, space constraints, and budget you need. They will then work with our in-house engineers to produce unique 3D renderings for your custom solution.

Enhanced security and stability

Although other products use 2mm thick steel pipes, we use 3mm thick steel as our product standard.

Excellent weather protection+protection

For products installed outdoors, we galvanized the steel and finished it with military grade powder coating process, which has excellent wind and rain protection function.

Customized color+brand

We provide a variety of standard powder coating colors, can also be customized to meet your unique specifications. Customized colors and trademarks help further promote your brand.

Quality service

From the design and production process to delivery and installation, we will provide you with services throughout.

ADVANTAGES OF TRAINING BOX

Ideal for outdoor areas

Capsule training system is designed and developed as an outdoor training system. Because of its high mobility and weather resistance, the training system can be used in many ways.

Customized solution

Scheme Design your capsule solution according to your wishes and ideas. Regardless of color, size or function. We customize the capsule training system for you according to your needs and space.

Weatherability

Capsule training system is 100% weather resistant. Because of the materials used and the additional powder coating, the training system can be used in wind and weather.

Ideal choice for military and police

Designed for military specific applications, container solutions can be quickly and easily transported, installed, and disassembled. There is no need to fix the system underground.

Transportation and unloading

Containers with ISO standards can be transported worldwide by truck, train or ship. In China, they can be loaded and unloaded at the required locations.

A range of solutions including equipment

Capsule training systems are available in different sizes, colors and designs. The capsule packaged solution is fully equipped, including training equipment that can accommodate up to 60 athletes.

FULL CUSTOMIZATION

Rubber floor

Customized size. Different from standard container

Application of customer trademarks

Construction of tensile structures supporting one or two containers

OUTDOOR TRAINING SOLUTION - TRAINING BOX

LP6020

DESIGN CONCEPT:

The training box is a perfect design. Combine the fun of indoor and outdoor training with the sports experience of portable fitness center. Create a complete fitness space solution for our customers and provide a good training space experience. In order to better meet the needs of outdoor fitness training venues, a modern and fully functional outdoor fitness space has been designed and created. A multi-mode training center that can accommodate multiple people.

ITEM LP8059

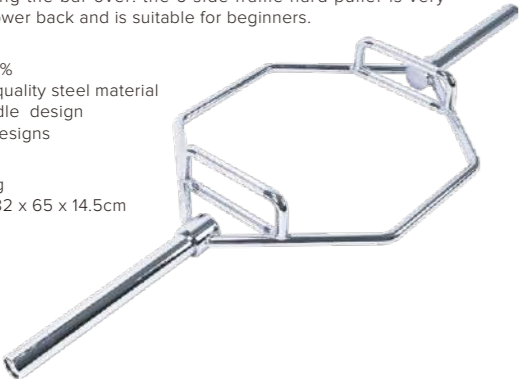

HEX BAR

The hex bar is made from high quality Q235 steel, the bar has higher strength and toughness, its weld- ability is better and it is more resistant to corrosion and not easy to rust. The two sets of knurling are designed to add aesthetic appeal and improve hand grip. During a workout, athletes can easily switch from one set of handles to another by simply flipping the bar over. the 6 side frame hard puller is very friendly to the lower back and is suitable for beginners.

- Tolerance: +/-1%
- Made of high quality steel material
- Extended handle design
- Two knurled designs

- Weight: 23.5kg
- Dimensions: 182 x 65 x 14.5cm

ITEM LP8309

OPEN HEX BAR

The Open Hex Bar is designed for strength training and weightlifting, allowing hard pulling and shrugging exercises to be performed safely without the friction and stress of the bar. It is an improvement on the traditional hexagonal frame with a small but very important change that makes it very powerful and allows the trainer to enter and exit training mode freely. The knurled design on the handle provides a firm grip for a safer workout.

- Tolerance: +/-1%
- Made of high quality Q235 steel
- Corrosion resistant
- Tilted handle design
- Open design

- Dimensions: 212 x 60 x 15cm
- Load capacity: 700LB

ITEM LP8310

LOG BAR

- Tolerance: +/-1%
- Made of high-grade steel
- Corrosion-resistant and protected against rust
- Cylindrical design

- Length: 186cm
- Diameter: 21.5cm
- Weight: 25.88kg
- Fully welded design

ITEM LP8302

BARBELL COLLARS

- Leather ring effectively protects
- Nylon material has good wear resistance and is durable
- Diameter is 50mm
- Locking protection safety
- Material: Nylon+TPPE
- Weight: 130g×2pcs

ITEM LP8061

MULTI-GRIP BAR

- Tolerance: +/-1%
- Special quenching process
- Knurled handle provides better grip
- Multi-handle design
- Corrosion-resistant and not easy to rust

- Length:198.5cm
- Weight: 12.15kg
- Material: steel
- Shaft diameter: 28mm

ITEM LP8301

BARBELL COLLARS

- leather ring effectively protect
- Nylon material has good wear resistance and is durable
- Diameter is 50mm
- Locking protection safety
- Material: Nylon+TPR
- Weight: 130g×2pcs

ITEM LP8062

MULTI-GRIP BAR

- Tolerance: +/-1%
- Knurled handle provides better grip
- Unilateral sleeve length: 35cm
- Number of handles: 8

- Length: 209cm
- Weight: 20kg
- Material: steel
- Shaft diameter: 50mm

ITEM LP8311

MAGNETIC BARBELL COLLARS

- Nylon material has good wear resistance and is durable
- Diameter is 50mm
- Locking protection safety
- Material: Nylon+TPR
- Weight: 123g×2pcs
- Size: 9.5×9.8×3.8cm

ITEM LP8099

SAFTY SQUAT BAR

The safety squat bar is made of high-quality steel. The pole has higher strength and toughness, better welding performance, stronger corrosion resistance and is not easy to rust. The squat bar has an integrated foam protective device at the neck and shoulder to provide additional comfort. The handles on both sides provide greater stability and ensure the center of gravity when squatting.

- Weight error: + / - 1%
- Two side handles for a firm grip during training to help stabilize your center of gravity

- Weight: 22kg
- Length: 220cm
- Fully welded design

ITEM LP8303

DUFFALO BAR

The arched squat bar has a sleek design and great tensile strength. The hard chrome finish on the sleeve and grip makes the surface smoother and the loading and unloading of the weight plates easier and smoother. Proprietary bend is designed for squatting and pressing movements and the curved bar reduces stress on the shoulders, biceps and back, reducing the risk of injury

- Tolerance: +/-0.2%
- Made of high quality 42CrMo
- Knurled handle design for a stronger grip

- Dimensions: 212 x 60 x 15cm
- Load capacity: 700LB

ITEM LP8305

URETHANE CHANGE PLATE

Livepro weight stacks are fixed by 45# steel core embryo, to ensure the hardness and stability of the weight plates. Their external high-quality polyurethane material is wrapped without hurting the floor while barbell is landed quietly. The weight plates are waterproof, wear-resistant, and can be used for a long time. There is a total of 6 colors to choose from weight plates, each color representing a different weight, and distinguishing the pickup easily.

Item	Color	weight	Item	Color	weight

ITEM LP8026

12-SIDED URETHANE GRIP PLATE

- Tolerance: +/-1%
- High quality polyurethane material
- The iron core is embedded in the barbell
- The strongest plates
- Hand grip hole design
- The 12 sided design effectively prevents the plates from rolling.
- The thickness of the polyurethane layer is 6-8mm

ITEM LP8023

URETHANE GRIP PLATE

- Tolerance: +/-1%
- High quality polyurethane material
- The iron core is embedded in the barbell
- Hand grip hole design
- The thickness of the polyurethane layer is 6-8mm

ITEM LP8020

RUBBER GRIP PLATE

- Available in a number of weights for different strengths
- Precision casting
- 50mm collar opening
- Impact resistant with reduced noise on drop
- Black Matte Finish
- Material: steel + rubber
- Olerance:+/-1%

ITEM LP8330

12-SIDED URETHANE BARBELLS

- Weight increment:10kg-30kg
- Tolerance: +/-2%
- High quality polyurethane material
- Special treatment for alloy steel grip
- Most durable integrity structure
- 12-sided anti-roll design on the head is designed for safer placement
- The head is wrapped with a polyurethane layer

Item	weight	Item	weight	Item	weight

ITEM LP8011

JERK BOX

The JERK box is made of 20mm thick multi-layer panels that can withstand tremendous pressure as a way for athletes to focus on improving impact. Fitness boxes are available in four splits with heights of 6/15/30/38cm, with sturdy internal support for ultra-safe stacking, and stacked fitness boxes are most commonly used in weight training.

- Made of high quality multi-layer board with a thickness of 20mm
- Double-layer structure with internal support
- Each layer of fitness box on both sides is designed with the hand grip holes

- Length: 915mm
- Width: 510 mm
- Detachable structure

ITEM LP8816

BARBELL CUSHION

The barbell cushion is a product designed for weightlifting and powerlifting, which can greatly reduce the sound and vibration when the barbell falls and protect the barbell very well. Bottom anti-slip fabric increases the stability of the barbell table to ensure that the mat will not easily move when the barbell falls, which is very practical for both gym and home fitness.

ITEM LP8320

- High-quality PVC wrapping
- High-density recycled cotton filled
- Design with handles on two sides
- Anti-slip fabric at the bottom

- Mat: PVC+ recycled cotton
- Weight: 22kg/pair
- Size: 76×60×15cm

PULLING BLOCK

Stackable pulling bloack is widely used in training, so it requires high durability and stability of the box. This upgraded pulling block is made of plywood, and the top is covered with high-density rubber, resulting in higher grip and increased anti-skid performance, which gives trainers more confidence.

ITEM LP6010

- The top rubber has better skid resistance
- Height can be adjusted freely
- Size: 60x45x7.5/12.5/17.5cm

T-BAR HANDLE

ITEM LP8186

SINGLE HANDLE

ITEM LP8187

LANDMINE HOME BASE

- High-quality steel material
- Powder coating is not easy to corrosion and rust
- 9.9mm thickened steel base
- Rotate and swing on multiple axes

- Size: 45x45cm
- Weight: 18kg
- Barrel diameter: 52mm

ITEM LP8185

PLATE RACK

The black matte surface on the metal frame is very textured. Made of durable metal steel, it is not easy to rust, beautiful and atmospheric. The perfect combination of triangle and arc can provide higher stability and bearing capacity. It is a perfect bell piece storage rack in the market at present.

ITEM LP8904

- Size: 89Lx67Wx105H(cm)
- Weight: 24kg
- Assembly required

VERTICAL PLATE AND BAR TREE

Olympic peak bell piece and weightlifting pole frame are the ideal bell piece and Olympic pole storage solutions for gyms, whether you are a commercial fitness club or a home gym. The metal frame with black matte surface is very textured, and the overall appearance is beautiful and atmospheric. Wide support for extra stability, with rubber feet at the bottom to protect the floor from scratches.

ITEM LP8851

- 3mm thick pipe, seamless welding technology, stable and durable
- Black frosted spray coating increases corrosion resistance and is not easy to rust
- The bell piece storage rod is hard chrome plated, smooth and not easy to rust
- The leather ring at the connection between the cross bar and the main bar effectively protects the bell blade from scratching
- The rubber support foot of the base provides effective protection

- Pin size: 100x50x2mm
- Rube thickness: 2mm
- Diameter of bar spigot tube: 60mm
- Diameter of bell piece hanging rod: 48mm
- Total length of bell piece hanging rod: 65cm
- Product size: 68Lx66.5Wx131H(cm)
- Weight: 24kg
- Assembly required

10 BARBELL RACK

This barbell rack is the ideal barbell storage solution for gyms, whether you are in a commercial health club or a home gym. The metal frame with a matte black finish looks very textured and it combines an aesthetically pleasing design with high-quality materials for an overall aesthetic look. Wide support leg provides additional stability with rubber legs at the bottom to protect the floor from scratches.

ITEM LP8853

- With 2mm thick pipe, with seamless welding technology
- Black frosting sprayed
- Protect the ground and be anti-slip
- Used to store up to 10 barbells

- Size: 83Lx85Wx125H(cm)
- Weight: 38kg
- Assembly required

5 BARBELL RACK

This 5 barbell rack is the ideal Olympics bar storage solution for gyms, whether you are in a commercial health club or a home gym. The metal frame with a matte black finish looks very textured and it combines an aesthetically pleasing design with high-quality materials for an overall aesthetic look. Wide support provides additional stability with rubber legs at the bottom to protect the floor from scratches.

ITEM LP8852

- With pipe being 2mm thick with seamless welding technology
- Black frosting sprayed
- Protect the ground and be anti-slip
- Used for Olympics bar

- Size: 85Lx70.5Wx131H(cm)
- Weight: 26.8kg
- Assembly required

6 BAR GUN RACK

- Made of high- quality steel with seamless welding technology
- Unique slot is designed and the rod can be
- Safely placed which is not easy to fall
- With clever wall-mounted design, it does not occupy the ground space
- Used to store barbells and can store up to 6

- Size: 98cm
- Weight: 9.5kg
- Assembly required

ITEM LP8812

VERTICAL PLATE HANGER

- With high-quality Q235 pipe
- Adopt seamless welding technology
- Black frosting sprayed
- The shelf is fixed on the wall, not occupying the floor space

- Material: Q235
- Size: 6.4Lx24.7Wx120H(cm)
- Weight: 9kg
- Assembly required

ITEM LP8893

HORIZONTAL PLATE RACK

- Made of high quality steel
- Black plastic spraying and sanding, not easy to rust
- Handle and wheel design for easy movement

- Large bell piece storage: 5 cells
- Spacing: 17/15/12/9/6cm
- Rebar diameter: 12mm
- Small bell piece storage: 6 cells
- Spacing: 6/4.5/4.5/4.5/4/3.5cm
- Rebar diameter: 10mm
- Product size: 143x39x31.5cm
- Weight: 12kg
- Assembly required

ITEM LP8900

VERTICAL BAR HANGER

- With High-quality Q235 pipe
- Adopt seamless welding technology
- Black frosting sprayed
- Suitable for Olympics storage
- Four expansion screws to fix

- Material: Q235
- Size: 8.7Lx10.6Wx32H(cm)
- Weight: 6.5kg
- Assembly required

ITEM LP8891

PLATE AND BAR STORAGE SET

- Material: Q235
- Size: 100Lx40.1Wx180.9H(cm)
- Weight: 28kg
- Assembly required

ITEM LP8894

9 BAR HOLDER

- With 6.5mm thick pipe, with seamless welding technology
- Black frosting sprayed
- Vertical storage is designed, covering a small area
- Protect the ground and be anti-slip

- Size: 44Lx44Wx16.5H(cm)
- Weight: 21kg

ITEM LP8874

NEW FOR 2023

DUMBBELLS & KETTLEBELLS

HEXAGONAL RUBBER DUMBBELL

ITEM LP8005

- Weight increment:2.5kg-30kg
- Long curing time, better wear resistance
- Special treatment alloy steel handle
- The hexagonal design will not easily roll
- 12mm thick polyurethane layer
- Tolerance: +/-2%

PREMIUM RUBBER DUMBBELLS

ITEM LP8004

- Weight increment:2.5kg-50kg
- Made of natural rubber + butadiene rubber
- Special treatment alloy steel handle
- Diamond knurling
- The rubber layer has a thickness of 15mm
- Tolerance: +/-2%

PREMIUM URETHANE DUMBBELLS

ITEM LP8000

- Weight increment:2kg-50kg
- High quality polyurethane material
- Special treatment alloy steel handle
- Sturdy dumbbell
- Tolerance: +/-2%
- 12mm thick polyurethane layer

COLORED STUDIO DUMBBELL

ITEM LP8076

- Weight increment:1kg-5kg
- High-grade PVC material
- More sturdy iron casting
- The 2mm thick PVC can effectively protect
- Anti-rolling ends
- Multiple color options

URETHANE DUMBBELLS

ITEM LP8002

- Weight increment:2kg-50kg
- High quality polyurethane material
- Special treatment alloy steel handle
- Diamond knurling
- The most robust dumbbell
- Tolerance: +/-2%
- 8mm thick polyurethane layer

12-SIDED URETHANE DUMBBELLS

ITEM LP8003

- Weight increment:2kg-50kg
- High quality polyurethane material
- Special treatment alloy steel handle
- The strongest dumbbell
- Tolerance: +/-2%
- 12mm thick polyurethane layer

URETHANE STUDIO DUMBBELLS

ITEM LP8075

- Tolerance: +/-2%
- High-quality polyurethane material
- Special treatment alloy steel handle
- Most durable integrity construction
- The polyurethane layer is up to 8mm thick

RUBBER KETTLEBELL

This is a kettlebell with stylish design, comfortable and spacious kettlebell handle design, which can be held by one hand or two hands. The groove on the upper part of the sphere is reasonably designed to be more conducive to wrist force. Solid cast iron is molded one time, with natural rubber wrapped, which can effectively protect the core and the floor, with stable center of gravity, strongness and durability.

- Molded in one piece
- Solid high-quality cast iron
- 5mm thick natural rubber layer

ITEM LP8903

DUMBBELL TREE

This cylindrical vertical dumbbell tree is the ideal dumbbell storage solution for gyms, whether you are in a commercial health club or home gym, to keep your free strength area organized. The metal frame with a matte black finish looks very textured and it combines an aesthetically pleasing design with high-quality materials for an overall aesthetic look. The wide base provides extra stability.

- With 2mm thick pipe, with seamless welding technology
- Black frosting sprayed
- 4 anti-slip bottom brace on the base

- **Size: 49L×49W×132H(cm)**
- **Weight: 35kg**
- **Assembly required**

ITEM LP8860

2 TIER DUMBBELL RACK

Used to store dumbbells

- Double-layer design, can store hexagonal or square dumbbells
- Made of pure steel, strong and stable

- **Size: 200Lx69Wx85.5H(cm)**
- **Weight: 41 kg**
- **Assembly required**

ITEM LP8898

2 TIER KETTLEBELL RACK

The 2 tier kettlebell rack keeps your kettlebells in order. The rack is sprayed with black plastic powder, and the matte surface is very textured. The storage tray is wrapped with leather around, and the internal rubber pad substrate reduces noise and protects the Kettlebell. Leather bands are attached to the four legs to effectively protect the ground.

ITEM LP8905

- Black spraying is not easy to rust
- 2mm thick pipe, stable and durable
- Rubber underlay inside tray to protect kettle bell
- Diameter of round pipe: 76mm
- Pipe thickness: 2mm
- Tray wall thickness: 3mm

- **Weight:43.5kg**
- **Size:131×80×81.5cm**
- **Diameter of round pipe:76mm**
- **Pipe thickness:2mm**
- **Tray wall thickness:3mm**
- **Material:steel + rubber**

3 TIER STORAGE RACK

The three-layer steel storage rack is painted with black plastic powder. The storage tray is wrapped with leather around, and the internal rubber pad substrate is used to reduce noise and protect the kettle bell. Leather bands are attached to the four legs to effectively protect the ground.

ITEM LP8906

- Black spraying is not easy to rust
- 2mm thick pipe, stable and durable

FITNESS SLACKRACK

It can be used for balance training and resistance training. It can be used along with other equipment to complete some movements and achieve whole body training. The equipment has a power coated metal frame, a 5m long classic webbing rope, and can be easily installed in 15 minutes. One end rotates to complete the length and tightness of the webbing.

- High quality Q235 tubes
- High temperatures to increase the feel, texture, and corrosion
- Manually adjust the length and tightness
- PVC leather wrap on both sides
- Anti-slip rubber pad

- Material: Steel
- Weight: 23kg
- Size: 205.5x34x32cm
- Width of webbing: 5cm

AEROBIC FITNESS STEP

Aerobic fitness step is a great fitness equipment. It can exercise, improve cardiovascular system, and strengthen the muscles of legs and upper body. The height of the fitness step can be adjusted freely when necessary, and the wide anti-skid base and feet make it more firm during the exercise.

- Size: 101x37.5x20.5cm

MULTI-FUNCTION DECK

This multifunctional pedal brings more creative thinking to pedal training sessions. One pedal can be used for a variety of purposes, including pedal exercises, push-ups, dumbbell benches, and strength training with a tensioner. The folding foot can be used to increase or decrease the height of the pedal, adjusting the brace foot can change the different tilt angle, experience a different way of movement. Non-slip padded feet and non-slip surface can increase the stability of the pedal, so that the movement is safer and more professional.

- Size: 121.5x34.5x35.5cm

LIVEPRO STEP

It can be used for aerobic pedal gymnastics training, mainly for hamstring and hip muscles, with many variations of movements and more entertaining, so it is sought after by fitness people at home and abroad. The pedal pads can also be used as training equipment alone, in short, can provide a variety of training solutions, and is an indispensable training tool.

- The surface bar is welded, which is not easy to loosen
- Tread texture design increases the grip
- TPE pad foot increases the stability
- Target training area on the surface is more humanized
- Adjustable height
- Safety locking
- Size: 108x43x(10.5-15.8)cm

MINI FITNESS STEP

The product is made of high-grade TPE with surface texture, which has a soft touch and guarantees firmness and stability. Step aerobics on the mini step can exercise the muscles of hamstrings and buttocks, supports a diversity of actions and provides better recreation.

- A plurality of anti-slip mechanisms
- Target workout zone
- Special locking structure

PRO-BOX 2.0

Designed for functional training, this all-in-one fitness bench is the latest idea in fitness bench solutions, perfectly designed to speed up transitions and improve safety, storing equipment neatly. It can make your training field look more neat and orderly and make training seamless, so this fitness bench will not only give you a different experience, but also accommodate what you need for your workout program.

ITEM LP8863-E

- High-quality steel tube materia
- Multiple storage ports
- Multifunctional Training
- Hydraulic lever to adjust the angle of the backrest
- Wheels design, which is easy to move
- Size: 1396L×420W×513H(mm)
- Weight: 83kg
- Bearing: 300kg

TRAMPOLINE

ITEM LP8250

- 1.8mm thick steel tube is thick and durable
- High-quality bouncing surface
- The maximum load-bearing capacity is 150kg, and the number of bounces is tested to be over 50,000 times
- Round tube diameter:28mm
- Support foot diameter:25mm
- Tube thickness:1.8mm
- Plane width:100cm
- Bounce surface width:75cm
- Support foot height:20cm

TRAMPOLINE WITH HANDLE

ITEM LP8250B

- 1.8mm thick steel tube is thick and durable
- High-quality bouncing surface
- The maximum load-bearing capacity is 150kg, and the number of bounces is tested to be over 50,000 times
- Steel tube anti-rust spraying
- Diameter of bottom round tube: 28mm
- Support foot diameter: 25mm
- Tube thickness: 1.8mm
- Plane width: 100cm
- Bounce surface width: 75cm
- Support foot height: 20cm

WEIGHT BAR

ITEM LP8145

Stainless steel core wrapped with comfortable and high-quality foam made of weight bar, can carry out a series of strength training and flexibility exercise. The sturdy steel core has high toughness and durability and is not easily bent and broken after repeated use.It is wrapped with comfortable non-slip foam on the surface and suitable for a variety of sports, including lunges, squats, sit-ups and other exercises.

- High-quality steel core
- The surface layer of high-quality foam wrapped
- TPR material on both sides
- Multiple colors to choose from

10kg	Black Blue	115×16.6cm
12kg	Black Red	115×16.6cm

WEIGHTED VEST

- High-quality Dupont material
- Weighted package padding can be adjusted
- Sponge sandwich with 2cm thickness
- Loop fastening belt
- Fixed by Velcro

ITEM LP8195

10KG WEIGHTED VEST

20KG WEIGHTED VEST

Desc.	Includes
10KG	1×10kg size vest 1×removable waist harness 10×0.92kg sand bag
20KG	1×20kg size vest 1×removable waist harness 10×1.92kg sand bag

TACTICAL VEST

- Durable weighted plates
- High-quality nylon fabric
- Lightweight waistband
- Comfortable shoulder design

ITEM LP8194

- Includes:
- 1 x 10kg size vest
- 1 x Removable waist harness
- 2x 5kg weight plate
- Material: Nylon, foam, steel
- Size: 53x32cm

PLATE

BULGARIAN BAG

Bulgarian exercise trains balance, flexibility, strengthens your waist, hands, and legs. **ITEM LP8130**

- High Comfort and Stable Center of Gravity
- High quality PVC material
- Surface is Waterproof and Easy to clean
- Super Load Bearing
- 5-22kg
- Size: 67×25cm

Item	Weight
LP8130-05	5kg
LP8130-08	8kg
LP8130-12	12kg
LP8130-17	17kg
LP8130-22	22kg

SAND BAGS

- Stable center of gravity
 - Heavy reinforced stitching
 - High-quality polyester fabric
 - Maximum load: 20kg
- ITEM LP8121**

AQUA BAG

Weight Lifting Aqua bag, loaded with unstable water masses inside, can improve stability, strength and core strength, build up firm muscles and shorten response time. Upon lifting the pack, water will roll from one side to the other, along with a shift in the center of gravity, the trainer's muscles will promptly respond to the shift. This product can attain better workout result than ordinary type. The Aqua bag is made of thickened, eco-friendly PVC, transparent color, sturdy and durable, and easy to clean. It can be readily used when loaded with water; folded and stored when poured out, making it a portable item.

- High-grade PVC material
- Easy to clean
- Easy to fill
- Firm handle
- Improving stability and core strength

THE WORM

The Worn can be used to strengthen the sense of teamwork and increase the understanding between players. The Worm builds full body strength and enhances explosive power. The 3m length worm contains 3 padded bags with a zip closure and weighs 75kg. The nylon carry handles are strong and durable and the cross stitching makes it extremely strong and resistant to breakage. **ITEM LP8132**

- Environmentally friendly and non-toxic
- Stable centre of gravity
- Anti-slip handles
- Reinforced stitching

- Size: 300×30cm

POWER BAG

Power bag can exercise your whole body strength, enhance your explosive power, hard pull, shoulder press, high lift and deep squat, etc.. **ITEM LP8120**

- Stable center of gravity
- Cover a layer of EPE pearl cotton
- High-quality PVC material
- High-density thickened NBR rubber handle
- Super load-bearing
- Surface is waterproof, and easy to clean
- 5-25kg

Item	Weight
LP8120-05	5kg
LP8120-10	10kg
LP8120-15	15kg
LP8120-20	20kg
LP8120-25	25kg

SAND BAG

Sand bags are available in six sizes, with max fill capacities of 20KG, 40KG, 60KG, 80KG, 100KG.Each Sandbag has a built-in filler bag with an additional zipper and hook-and-loop closure—ensuring filler material stays fully contained as you work through your regimen. **ITEM LP8106**

- Material: Cordura
- Does not contain filling material

Item	Weight	Size
LP8106-20	20kg	37x10cm
LP8106-40	40kg	37x20cm
LP8106-60	60kg	37x32cm
LP8106-80	80kg	37x38cm
LP8106-100	100kg	37x46cm

COVERED BATTLE ROPE

Swing Rope is a simple tool that almost anyone can use for a full body dynamic workout. **ITEM LP8172**

- Heat-shrinkable non-slip handle
- High-strength polyester silk synthesis
- Cloth cover wrapping

Item	Size	Weight
LP8172-S1	1.5"x30'	7.6kg
LP8172-M1	1.5"x40'	10.2kg
LP8172-L1	1.5"x50'	12.8kg
LP8172-S2	2"x30'	13kg

ROPE PULLER

The Livepro Rope Puller is based on the simple principle of rock climbing and utilizes a magnetically controlled resistance machine that provides an isometric aerobic workout. People of any age and athletic ability can safely use our rope for training. It has a total of six levels of resistance, and we can change the speed of the rope puller by adjusting the resistance for different fitness purposes to provide maximum resistance training for athletes. The polyurethane material of the rope can provide comfortable grip and reduce friction and slippage during exercise.

- Magnetically controlled resistance
- Comfortable and easy to grip the rope
- Six-gear resistance adjustment
- With simple installation method
- Weight:4.7kg
- Size:
Rope:400×2.5×1.8cm
Host:20×16cm

ALUMINUM HANDLE BATTLE ROPE

- Knurled aluminum handles
 - High-strength polyester silk synthesis
 - Rope diameter: 1.5"
 - Handle diameter: 2"
- ITEM LP8173**

Item	Size	Weight
LP8173-S1	30'	8.1kg
LP8173-M1	40'	10.7kg
LP8173-L1	50'	13.3kg

BATTLE ROPE STORAGE HANGER

- Size: 34.3×20×5cm
- ITEM LP8178**

BATTLE ROPE ANCHOR

- Size: 23×5×9cm
- ITEM LP8179**

WOODEN GYM RING

Wooden gym rings are designed for fitness training, which is more challenging than pull-ups. This ring is built from 32mm diameter birch wood and is mainly used in strength training. The wood material is strong, durable, light weight, easy to carry and can be assembled quickly.

- Natural birch wood
- iron locking buckle
- Anti-slip handle
- Ring diameter:32mm
- Outer diameter of ring:23.4cm

SUSPENSION TRAINER

This suspension trainer can improve core stability, is small, flexible, and can enhance your flexibility to exercise. It is also easy to carry and install anytime and anywhere. The kit includes hanging straps, door buckles, hanging buckles, and net bags. The length of the blue adjustment belt on the suspension can be freely adjusted. Training with the suspension trainer does not only exercise your whole body but also increases your body's stability.

- High quality, high-density polypropylene material
- Adjust the length as you like
- Alloy carabiner
- Integrated handle and foot
- Encrypted stepping on the line
- Adjustable length range180-270cm
- Webbing width: 3.8cm

ELASTIC SUSPENSION TRAINER

This suspension trainer has an extremely load bearing capacity and can be adjusted according to the changing goals of different body types. It is also a common training equipment for teams in modern gyms and boutique studios. The equipment is easy to install and can be easily done where there are poles or doors. This trainer exercises all of the body muscles while improving core strength, endurance, flexibility, and stability. It is very suitable for yoga, pilates, swimming, football, and basketball players.

- High-quality nylon webbing
- Alloy carabiner
- Comfortable non-slip handle
- Generous load-bearing band
- Multifunctional training
- Size:
Latex tube: 500×14mm
Weaving bandwidth: 3.8cm

AB WHEEL

- Unique design allows you to stretch and strengthen all four abdominal muscles
- Provides a smooth range of motion in any direction
- Made of engineering plastic, hard and durable

GLUTE HAM ROLLER

Designed specifically to be the best hamstring curl unit possible, we quickly found that it was great for a variety of ab, shoulder, leg and chest exercises as well. The Glute Ham Roller allows you to add or subtract resistance easily and is perfect for large groups, and mobile training needs.

- Size: 66×40.5×10(cm)
- Weight: 5kg

PUSH-UP BAR

- High-quality steel material
- Anti-slip support feet
- Surface spraying
- Wider base

PARALLETES PAIR

- High-quality steel pipe
- Anti-slip feet pad
- Thickened foam polyethylene material
- Bearing weight: 150kg

3-IN-1 WOOD PLYO BOX

The 3-IN-1 wood plyo box is made of high-quality birch wood with a beautiful, non-slip, and special texture. The sturdy plywood and internal reinforcement components make the plyo box more stable and durable.

- Inner handle design
- High-quality birch material
- Surface non-slip texture
- Three different heights for various training techniques
- Cross-supported inside

- 3 heights selection
- Weight:23kg
- Size:50L×60W×75H(cm)
- Thickness:1.8cm

STACKABLE RECTANGULAR PLYO BOX SET

This plyo box for jumping is the perfect equipment to enhance one's explosive power. Five soft boxes of different heights can be combined and used in any combination or individually. They are excellently designed with bright colors to enhance one's training motivation. The inner portions are filled with pearl cotton, the surfaces are wrapped in PVC material, and strong velcro is used to ensure staking stability.

- Soft surface material
- Velcro is easy to operate
- Non-slip PVC surface
- 5 height options

Item	Size
LP8151-XS	900×750×75mm
LP8151-S	900×750×150mm
LP8151-M	900×750×300mm
LP8151-L	900×750×450mm
LP8151-XL	900×750×600mm

EPE

3-IN-1 SOFT PLYO BOX

3-IN-1 soft plyo box can be used for a variety of exercises. The box can be flipped to obtain three different heights of 50/60/75cm for training. It has an inner wooden material, an outer non-slip leather wrap, and a center filled with EVA material. The plyo box is stable and extremely cushioned, thus better protecting the trainer and reduces leg injuries while jumping.

- Soft surface material
- Thick birch material
- High quality PVC material
- Three heights for various training
- Supported at right angles to ensure super load-bearing ability

PRO STACKABLE RECTANGULAR PLYO BOX SET

The plyo box horse is the perfect piece of equipment to enhance your explosive power. 4 soft boxes of different heights can be used in any combination stacked together or individually. The internal wooden frame construction provides excellent stability. The outer frame is wrapped in EVA for good cushioning and the outermost layer is wrapped in high quality PVC for a less rigid feel and to ease the impact on the legs and other parts of the body during training.

- High quality EVA
- Stability and safety
- Multiple training heights

- Weight: 15.5/22/32/36.5kg
- Dimensions: 90 x 75 x 15/30/45/60cm

QUICK HURDLES

- High quality engineering plastic material
- Height adjustable
- Lightweight and easy to carry
- covered with soft blue plastic to effectively protect the product,

QUICK CONES

- High strength plastic material
- Lightweight and easy to carry
- Bright colors

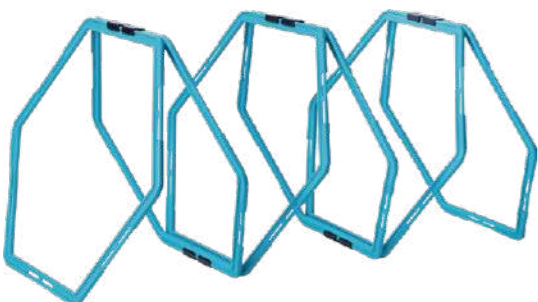

AGILITY CONE

- High strength plastic material
- Lightweight and easy to carry
- Better balance and stability.
- Diversified training methods

AGILITY GRID SYSTEM

- High quality engineering plastic material
- Lightweight and easy to carry
- Use the black buckles to form any combination

AGILITY DOT

- High quality polyurethane material
- Reverse non-slip design
- Digital sign

LATERAL ENDURANCE HURDLE

- High quality PVC and EPE materials
- Interior EPE is highly elastic
- Better balance and stability.

RUBBER AGILITY LADDER

Livepro's agility ladder is made of high quality durable rubber material. The material is not easily worn out. This ladder can be used for agility, flexibility, and balance training. The agility ladder has high toughness and great stability.

- High quality rubber material
- High toughness, stability, and not easily tangled
- Grids with numbers 1-10 designed
- Easy to store
- Length: 452cm
- Width: 41cm

BASE

- Size: 20×10.6cm
- Material: ABS

BUCKLE

- Size: 6.5×4×4cm
- Material: Nylon

HURDLE POLE

Create dynamic and challenging speed and agility training sessions to quickly improve your footwork and agility.

- Great for Speed & Agility
- Fits all Notched Soccer Cones

- Diameter: 2.5cm
- Length: 100cm

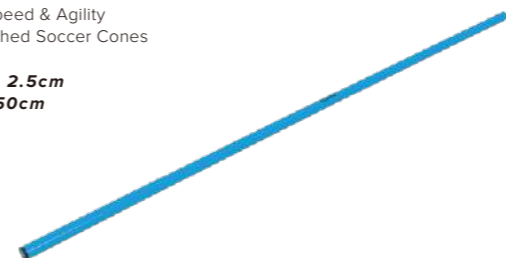

HURDLE POLE

Create dynamic and challenging speed and agility training sessions to quickly improve your footwork and agility.

- Great for Speed & Agility
- Fits all Notched Soccer Cones

- Diameter: 2.5cm
- Length: 150cm

HURDLES SET

- Easy to disassemble
- The rod is fully adjustable up to 150 cm
- Suitable for indoor and outdoor and competitive sports

- Diameter: 2.5cm
- Length: 150cm

FRISBEE

- High quality PE material
- Anti-skid and wear-resistant
- Lightweight and portable
- Size: 27.5×3.3cm
- Weight: 175g

SPEED BAG

The speed bag is used for speed and explosive training, with 4 booster bags full of sand and a maximum weight of 20kg, with adjustable length webbing to increase explosive power through forward, backward and lateral training. Speed bag outside is wear-resistant rubber material, can be used indoors and outdoors, will not damage the floor and will not easily wear. Inside PVC leather is waterproof and wear-resistant, and easy to clean.

ITEM LP8184

- Wear-resistant rubber on the outside
- Internal PVC leather
- Strong and adjustable nylon webbing
- Good resistance to stretching capacity.

SLED

- High-quality steel pipe, not easy to rust after high temperature baking
- Explosive power and strength of the movement
- A variety of sports
- Smooth base
- Size: 110x67x(70-107)cm

ITEM LP8142

GYM SLED

Ideal for strength and functional training, this newly designed sled is the most versatile sled on the market. The thickness of the base steel plate is 5mm, which is wear-resistant and can be used for any ground from asphalt to turf. Two detachable push-pull rods for easy change of direction. It is also equipped with a handle with a length of 107cm, which is suitable for sports such as pushing and pulling. The solid steel half of the bottom bracket can be used for training with the drawstring to achieve diversified training.

ITEM LP8148

- High quality materials
- A variety of sports
- Smooth base

- Size: 150x57x77cm
- Weight: 40kg

LIVEPRO SLED

The sled transportation method is in line with the functional training that is now advocated. Using sled training can help you exercise your body muscles, improve athletic ability, and reduce fat. There are many exercise methods for sledding, such as pushing sled, pulling sled, crawling, sledding and so on.

ITEM LP8149

- The flat bottom and strong steel plate allow you to push and pull smoothly on multiple surfaces
- Can be used with any standard aperture plates
- Made of steel, strong and durable
- Provides 6 kinds of attachments, which can transform the sled into a "lawn mower", "wheelbarrow" or skateboard within a few minutes, which can be pulled by the attached safety belt and brought to the carabiner attachment.

- Material: steel
- Size: 210x80x106cm
- Weight: 50kg

ANTI-BURST CORE BALL

This anti-burst core ball has different sizes and colors, so you can freely choose it according to your height. The unique anti-burst technology ensures that it can withstand years of regular use, and the ball has a high load capacity, which can withstand 400kg of weight by test.

ITEM LP8201

- Multiple sizes chosen (55/65/75cm)
- Better grip and friction
- Tested to exceed 800kg

Item	Size	Height
LP8201-55	55cm	5' - 5'7"
LP8201-65	65cm	5'8" - 6'3"
LP8201-75	75cm	over 6'3"

BLANCE TRAINER

Balance trainers are used for balance training. Whichever exercise is taken, the unstable surface coupled with core muscles can improve balance and stability, give user an access to more dynamic exercise.

ITEM LP8216

- 3D features added to action
- Handle design increases the possibility of exercise
- Black texture surface increases the coefficient of friction and shields from slippage.
- Size:103x48.5x25cm(air inflation)

BALANCE BOARD

The balance board is ideal for injury rehabilitation, improving balance and increasing strength and stability in your core muscles.

ITEM LP8214

- Size: 59x42x11.5cm
- Weight: 300g
- Mat: PVC

BALANCE TRAINER

Fitness balance hemisphere can be used for balance training and core muscle exercise, and improve coordination, muscle strength and flexibility. Standing, jumping and push-ups can be completed on it, and even you can also carry out more daring challenges.

ITEM LP8211

- High-quality PVC material
- Anti-slip design
- Maximum User Weight: 300kg
- Height: 22cm
- Diameter: 61.5cm
- Weight: 5.2kg

BALANCE BOARD

- Template with thickness of 1.8cm is heavy load-bearing and safer to use
 - High-quality birch wood material
 - Anti-slip design of surface layer
- ITEM LP8362
- Size: 80×26×1.8cm
 - Roller diameter: 11cm
 - Roller length: 18cm

BALANCE PAD

- Balance pad has now been widely used to improve muscle and joint strength, exercise the sense of balance and human coordination.
- ITEM LP8360
- High-quality polyurethane material
 - Stable and anti-slip
 - It is waterproof internally, which is easy to clean
 - Size: 49×39×5.5cm

CONDENSED PEANUT MASSAGE BALLS

- Livepro Massage Balls provide targeted cold compression massage therapy to help reduce joint inflammation and muscle pain.
- ITEM LP8511
- Food-grade stainless steel
 - Ergonomic Handle
 - Three in one for quick recovery
 - Size: 17.5×9.3cm
 - ball diameter: 35mm

STRETCH BOARD

- Relieve joint strain, joint sprain, arch pain and plantar fasciitis, achilles tendinitis and other foot pain.Helps restore flat feet, arches, valgus, inverted X-shaped legs, and O-shaped legs.
- ITEM LP8363
- Environmentally friendly materials, odorless, durable, corrosion-resistant, easy to clean, and not deformed
 - Weight: 4.88kg
 - Size: 46×38×5.8cm

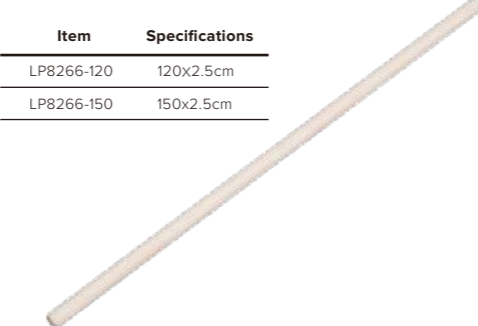

MAGNETIC MASSAGE STICK

- Livepro magnetic massage stick is ergonomically designed, which is composed of three rollers containing magnets, two handles and one roller.
- ITEM LP8264
- Magnetic therapy
 - Ergonomic design
 - Pressure control
 - Length: 41.5cm

EXERCISE STICK

- Help you to shape body, slim waist and give you attractive figure.Comfortable feel, logs are completely cuts, straight and no deformation.Does not hurt hands, no burrs, with polishing process, comfortable feel.
- ITEM LP8266
- Made of wood material, durable, safe and environmentally friendly.

MUSCLE MASSAGE BALL

- Material: Polyurethane
 - Diameter: 6.5cm
 - Weight: 150g
- ITEM LP8501

MASSAGE PEANUT BALL

- Length: 14cm
 - Diameter: 6.5cm
 - Weight: 300g
- ITEM LP8502

FOOT MASSAGE BALL

- Designed for the soles of the feet and small muscle groups
- ITEM LP8507
- High-quality polyurethane material
 - Unique design pattern and texture
 - Diameter: 6.8cm

TARGET MASSAGE BALL

- High-quality polyurethane materialUnique design pattern and texture
 - Portable and easy to use
 - Weight: 238g
 - Diameter: 12.5cm
- ITEM LP8508

PEANUT MASSAGE BALL

- Size: 19.4×10.6cm
 - Weight:250g
- ITEM LP8509

FOAM ROLLER

- Durable EVA environmental protection material
 - Muscle area: arm, sole of foot, neck shoulder, leg, thigh
 - The inner tube is made of high-strength industrial material, bearing 200kg, avoiding bending and fracture.
 - Innovative massage area design
 - Size: 33×13cm
- ITEM LP8231

HIGH-DENSITY FOAM ROLLER

- Compared to the Livepro foam roller, this foam shaft provides a higher density for rolling tight large muscle groups and knots to reduce soreness and improve mobility. Regular use of the roller can provide benefits such as increased flexibility, improved balance and mobility, and readiness for optimal athletic performance.
- ITEM LP8238
- Strong and durable high-density EPP
 - Color: black+blue

Item	Length	Diameter
LP8238-45	45cm	15cm
LP8238-90	90cm	15cm

TELESCOPIC FASCIA ROLLER

- Easy to stretch and easy to carry
 - The telescopic fascia roller is made of high-strength industrial material, tested to stretch to full size and can withstand 200kg of human weight
 - Each 3D massage point is made of solid soft rubber of moderate hardness
 - Environmentally friendly material without odor
- ITEM LP8239

FOAM ROLLER

- Special shape prevent spine compression and bone bruising.Foam rolling is proven to reduce delayed onset muscle soreness. Provides more precise goals for faster and more effective muscle release and recovery.
- ITEM LP8234
- Material: EPP
 - Size: 45×15cm
 - Weight: 350g

FOAM ROLLER

- Massage allows muscle relaxation and contributes to better recovery.
- ITEM LP8233
- Design of light massage area in the middle and deep massage area on both sides.
 - Durable EVA environmentally friendly material
 - Length: 45cm
 - Diameter: 11.5cm

STRETCHING/CONTOURING/
BALANCING/STRENGTHENING TOOL

- It effectively improves poor body shape, increases muscle endurance, enhances body shape, balances muscle fatigue, and increases stability
 - It combines the curved shape of the dolphin and the structure of the human spine bone to complement the natural curve of the spine
 - The Dump design on the back of the spine corrector increases the massage lunchon and promotes recovery
- ITEM LP8265
- Mat: PU
 - Weight: 1.1kg
 - Measurement: S/M/L
 - Size: 61×25×17cm

AB MAT

The AB mat is a tool to support your back while you are exercising your abs, ergonomically designed to bend your spine to lengthen your abdominal muscles and provide optimal comfort and range of motion while you are exercising.

ITEM LP8345

- Waterproof and wear-resistant
- High-density EPE foam core
- Weight: 750g

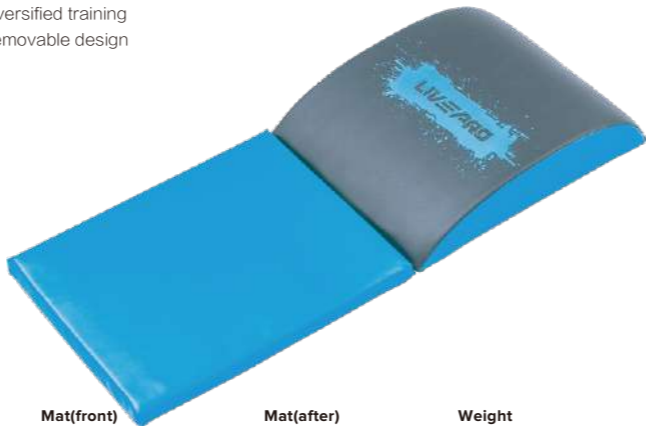

AB MAT

AB mat is a tool to support your back when you exercise your abdominal muscles. It is ergonomically designed to flex the spine to lengthen abdominal muscles. Better comfort and range of motion.

ITEM LP8348

- Diversified training
- Removable design

Mat(front)	Mat(after)	Weight
38×30×7.5cm	37×30×2.5cm	1.14KG

MULTIFUNCTIONAL STRETCH TRAINER

Multifunctional stretch trainer can arbitrarily adjust structure which allows this product to provide the user with the support needed. A product can play the role of multiple products, and can be used to carry out mobility training which many other equipment is difficult to achieve. At the same time it provides the function of equipment such as split squat rack, hip trainer, Roman chair and so on. Mobility training is much more than flexibility training, and in addition to stretching, it provides a stable crotch fixation for a variety of training. Whether it's stability training, total body activation, or increasing the range of motion of your muscles. Its adjustable seat, removable grips, and existing and developing accessories allow this equipment to maximize the fit of your training. It fits perfectly into whatever space you have, while saving you space.

ITEM LP8514

- Multifunctional stretch trainer is a combination of multiple equipment functions in one, with one product to play the role of multiple products
- Shelf surface is sprayed with black, which increases corrosion resistance, and is not easy to rust
- Seat height can be adjusted by 6 gears and the height range is 45-60cm
- Comfortable leather seats increase the experience
- The tail is equipped with two pulleys for easy movement

- Brand: Livepro
- Color: black
- Material: steel
- Weight: 49kg
- Product size: 150 × 80 × 45-60cm
- Tube size: 7.5 × 7.5 × 0.3cm
- Using are: 150×80cm

TPE YOGA MAT

- High-density environmental protection TPE material
- Anti-slip texture on the surface
- Designed with hanging holes
- Size: 183×61×1cm

ITEM LP8227

HANGING CORE MAT

- High-density environmental protection PVC material
- Anti-slip texture design
- Designed with hanging holes
- Size: 120×60×0.7cm

ITEM LP8220

MATS RACK

Training mat storage rack is designed for hanging training mats, and double-sided storage can accommodate multiple training mats at a time.

ITEM LP8814

- Made of high-quality steel material
- Shelf surface is sprayed with black, which increases corrosion resistance, and is not easy to rust
- Double-sided storage design
- Directional wheels configured

- Size: 74L×74W×207H(cm)
- Assembly required

HANGING TRAINING MAT

- Made of high-quality synthetic materials
- Anti-slip texture design on the surface
- Designe with hanging holes
- Size: 140×60×1.6cm

ITEM LP8229

NBR SPORTS MATS

- Made of high quality NBR material, it has high tensile strength
- Anti-slip texture design on the surface
- The 10mm thick mat is soft and comfortable
- Size: 185×80×1cm

ITEM LP8228

MATS HANGER

- Made of high- quality steel with seamless welding technology
- The black frosting is sprayed on the shelf layer to increase corrosion resistance, which is not easy to rust
- Clever wall-mounted design

- Size: 69.5L×26W×6H(cm)
- Assembly required

INTERVAL TIMER

- 4 inches width, a total of , mode, hours, minutes display
- Equipped with charger, remote control, voltage 220V
- The 4.0" LED digits in blue/red are visible from hundreds of feet away
- Great for hiit, mma, boxing, fitness bootcamps, and other interval
- Training regimens
- Integrate heart rate monitoring into your workouts and have your heart rate periodically or permanently display on the clock so you know how hard you're working and can set a proper pace
- Size: 72×16×4cm

ITEM LP8143

POWER BAG RACK

The power bag rack holds up to 5 energy packs and features a highly durable frame structure with a unique internal support design that prevents the pack from sagging in the middle and helps maintain its shape, making it an ideal storage solution for the gym.

ITEM LP8802

- Seamless welding technology
- Wider base is more stable
- Increase space utilization

- **Size: 66L×76W×145.5H(cm)**
 - **Weight: 20.5kg**
 - **Assembly required**
 - **Balls NOT included**

WALL BALL RACK

This single-sided rack holds up to 5 wall balls and features a highly durable frame structure with a unique internal support design that prevents the energy pack from sagging in the middle and helps maintain its shape, making it an ideal storage solution for the gym.

ITEM LP8811

- seamless welding technology
- Wider base is more stable
- Prevent the sphere from sagging
- Increase space utilization

- **Size: 66L×76W×173H(cm)**
 - **Weight: 21.7kg**
 - **Assembly required**
 - **Balls NOT included**

STORAGE BOX

The flip lid is made of 4mm diameter steel wire edge with shock absorbing material to make it more silent. With 130cm long, 70cm wide and 81cm deep, it has a large enough storage space to accommodate such as resistance tubes, boxing gloves, gym balls, etc. The four corners assembled with universal wheels, can easily move and is very convenient.

ITEM LP8862

- **Size: 130L×70W×81H(cm)**
- **Weight: 43kg**
- **Assembly required**

10 MEDICINE BALL RACK

The double-sided medicine ball rack provides a vertical storage solution for up to 10 medicine balls, reducing wasted gym space. With an improved design, it holds balls on both sides, making it easy for trainers to access, in addition to increasing the number of balls stored.

ITEM LP8806

- Wide A-shaped base is for extra stability
- Double-sided storage
- Seamless welding technology
- Color: black

- **Size: 37L×56W×141H(cm)**
 - **Weight: 11.5kg**
 - **Assembly required**
 - **Balls NOT included**

BRACKETS-MEDBALL STORAGE

6mm thick wall main plate, with 2.5mm thick, 25mm diameter wall ball support round tube, has better load-bearing performance and metal matte surface looks very textured for an overall aesthetically pleasing look. The main plate is fixed to the wall by 6 screws, which is stable and durable.

ITEM LP8892

- **Size: 125L×37.5W×97.3H(cm)**
- **Weight: 48kg**

INFINITY SERIES

LivePro two-color plates are fixed by an alloy steel core with a diameter of 13cm and a thickness of 7mm to ensure the hardness and stability of the plates. The outer layer is wrapped with high quality polyurethane material with a thickness of 21.5-54.3mm. The plates are waterproof, wear-resistant and can be used for a long time. The plates has unique appearance design and exquisite color matching, in line with IWF standard. After strict fall test, it falls 30000 times from the standard height (except 5KG), and is not easy to appear deformation and damage. Various colors can be selected, each color represents different weight, easy to distinguish and pick up.

- Tolerance: +/-1% of claimed weight
- High-quality polyurethane
- Alloy steel blank
- Thinner Ring Piece
- Polyurethane layer thickness:21.5-54.3mm

ITEM LP8712

GYM CHALK

When you are in the gym or climbing and want to have a better grip, talcum powder is the best choice. It is made of natural magnesium carbonate with no additives and fillers. When you work out, using talcum powder can greatly increase the friction between your palm and the equipment, thus increasing grip strength and not causing slippery hands.

- Spherical talcum powder is to prevent waste in use
- Equipped with storage bag is to prevent dust from flying

ITEM LP8190

BARBELL PAD

- Material: PU+NBR
- Weight: 320g
- Size: 44×9×9cm

ITEM LP8713

BARBELL PAD

The barbell bar shoulder pad can effectively improve bruising and pain caused by the pressure on the shoulders and neck during barbell squats, the high-density foam liner protects the neck and back during exercise, designed for comfort. Non-deformable, and thickened design is suitable for a variety of barbell bars, and the outer layer of non-slip composite fabric (polyester outside and diving fabric inside) wrapped is comfortable, breathable, wear-resistant and used, which can be firmly fixed by Velcro.

- Outer laminated fabric
- Shoulder pad with high-density foam lining with 9cm thickness, is comfortable to use, not easy to deformation, and fits the neck contour
- Velcro is firmly fixed after installation,which is not easy to move and easy to remove

ITEM LP8093

- Size: 45x9cm

FITNESS GLOVES

Fitness gloves are made of high-quality lightweight microfiber, which is comfortable to wear and breathable mesh on the back of the hand can keep hands dry. The silicone print on the palm area prevents slippage and injury and allows for a quick improvement in grip strength for athletes. These gloves are not only suitable for weightlifting, but also perfect for lifting, gymnastics, kettlebells, barbells and other workouts.

- Elastic wristband is comfortable and fit
- Silicone palm can increase hand grip and prevent injuries
- Size:
M:17×12.5cm
L:17.5×13.5cm

ITEM LP8260

PRO ELBOW SLEEVE

For the tennis player, golf lover, the weightlifter, or those with arthritis, tennis elbow or golfer's elbow. Compression elbow sleeves help support & stabilize muscle movement & reduces impact forces. Works well for volleyball, football & baseball athletes or even those with chronic elbow pain. Our elbow sleeve provides warmth to the elbow joint that greatly helps in the recovery process translating to better performance.

- Material: Scr rubber+polyester
- Weight: S:84g M:88g L:91g
- Size: S M L

ITEM LP8700

PRO KNEE SLEEVE

Protecting your knees is of outmost importance for safeguarding your mobility, long-term. Made out of a perfect blend of SCR and high quality polyester, our knee sleeves are lightweight and durable, withstanding frequent washing and daily use.

- Material: Scr rubber+polyester
- Weight: S:108g M:112g L:118g XL:124g
- Size: S M L XL

ITEM LP8701

WEIGHTLIFTING BELT

This is a weightlifting belt made of heavy leather, ideal for those who require strength in a weightlifting belt. If you want to get into the traditional leather belt, this is a good choice for you.

- High-quality cowhide material
- Waist protector cotton design
- The inner side of the waistband is made of suede
- Double claw buckle design
- Size:
M:105×11cm
L:130×13cm

WEIGHT BELT

The PU material on the front of this belt is combined with the polyester on the inside. The EVA lining inside makes it comfortable and compact, making it a more comfortable belt on the market. The widest part of the belt is 19cm, which is consistent with your natural shape, lightweight and highly durable. The sturdy steel climbing buckle and high-strength knitting belt can make it have higher load capacity. You can connect relevant equipment to this knitting belt, and then you can easily carry out weight-bearing training.

- Material: EVA+PU+polyester
- Weight: 572g
- Size: 98×14-19cm

WEIGHTLIFTING BELT

The Livepro weightlifting belt provides a wider and more comfortable back area that perfectly fits the waist. Stabilize athletes' core strength, reduce back pressure, and increase protection. Provides better support and stability for the waist, allowing you to focus more on exercise.

- Material: polyester+EVA
- Weight: 420g
- Size:
S:75×18×2cm
M:86×18×2cm
L:95×18×2cm

SWEAT WAIST TRIMMER

- Material: OK Fabric+SBR
- Weight: 300g
- Size: 125×19.5×0.5cm

POWER PULL BELT

- Outer PU leather
- One size fits many body types
- Ergonomic design

TRAINING BELT

This is a training belt with steel chains that can meet your requirements for weight during training. Durable material and soft back support fit your waist and provide adequate support.

- Material: polyester+steel
- Weight: 1.12kg
- Size: 80×15×1cm
- Chain length: 93cm

NECK HARNESS

The neck harness for weight training is the perfect tool to attain a stronger, healthier neck. It is ergonomically designed to make it easy to wear. The neck and head harness is also adjustable to get a snug fit. This neck exercise device is made of breathable polyester fiber and steel rings, which are resistant to wear and tear.

- Material: polyester+steel
- Weight: 720g
- Size: 26×7×7cm
- Chain length: 88cm

PULL-UP ASSISTED BAND

Easier to adjust the length and fixation, this pull-up band can also be easily installed and removed. The three inserted resistance elastic bands can be installed in less than 30 seconds, combining variable resistance bodyweight training with instability, and the non-slip foot stirrups can be used as a assisted band for pull-up training.

- Easier to adjust the length and fix
- High-quality latex material
- Nylon fabric cover protected
- Foam handle increases grip
- Elastic band has tension of 30LB, whose stretchable length can be three times of the original length, and can be stretched more than 10,000 times

DOUBLE RESISTANCE TRAINER

After putting the equipment on, come to a resistance training, experience the whole-body resistance and impact brought by the equipment. Our products are thoroughly tested to exercise your whole body, and you can get a stronger core strength with the fight training.

- High-quality latex material
- Nylon fabric cover protected
- Easy to install, disassemble and adjust
- Elastic band has tension of 30LB, whose stretchable length can be three times of the original length, and can be stretched more than 10,000 times

STRETCH TRAINER

It trains your entire body with a combination of variable resistance bodyweight training and instability, builds core strength, shapes your legs, hips and you can get a stronger core to support your whole body.

- High-quality latex material
- Nylon fabric cover protected
- Easy to install, disassemble and adjust
- Stretched more than 10,000 times

EXPLOSIVE POWER TRAINER

This product plays a very active role in strength training, combining variable resistance bodyweight training with instability through a quality resistance band. It meets a variety of athletic goals, shapes your core, exercises your legs, hips, and arms, and you can get a stronger core to support your entire body.

- Easy to install, disassemble and adjust
- Stretched more than 10,000 times
- High-quality latex material
- Nylon fabric cover protected

CHEST EXPANDER

This chest developer can be adjusted by the number of resistance tube to choose the appropriate resistance and provide progressive resistance in the traditional exercise, thereby enhancing the chest, shoulders, arms and front core strength. It is wrapped by nylon material externally, which increases the feel of the hand and also plays a role in protecting athletes and latex tube.

- Adjustable resistance
- High-quality latex material
- Waist support with multiple sports
- Foam grip
- Stretched more than 10,000 times

BOUNCE TRAINER

Bounce trainer is perfect for basketball, volleyball, soccer, tennis, running and other training, exercises the hip, calf, abdomen or limb strength, increases vertical jump, improves leg strength, explosive power, flexibility, balance and endurance.

- High-quality latex material
- Nylon fabric cover protected
- Easy to install, disassemble and adjust
- Stretched more than 10,000 times

DOUBLE COMBAT TRAINER

It builds strength and endurance through training and lends two sets of rings to add resistance to each movement such as striking, connecting the four resistance bands of the wrist strap and foot sleeve to a fixed point, and then you start practicing.

- High-quality latex material
- Nylon fabric cover protected
- Easy to install, disassemble and adjust
- Stretched more than 10,000 times

Peripheral products are the extension, supplement, and improvement of a brand and brand culture. Peripheral products can open up more usage scenarios for the brand. Especially for lifestyle products, it is easier for brands to touch the daily lives of consumers. This highlights its warm and thoughtful brand image.

Some peripheral products are returned to consumers in the form of gifts. This good interaction also further narrows the distance between brands and consumers, achieving indirect marketing.

NEW FOR 2023

FOR BETTER PERFORMANCE

BOXING GLOVES

Durable boxing gloves with Velcro, is perfect for sparring or fitness workouts. The surface is made of leather, and the interior of the leather is filled with durable and comfortable EPE cotton and in the bend of the finger, it is filled with 1cm diameter cylindrical cotton, which is more effective protection of all parts of the finger. Beautiful slogan and tear effect pattern is engraved on the back, with palm opening design, which is comfortable to wear and fit. There are three colors, representing three different sizes, for easy access.

ITEM LP8600

- Made of high-quality PU leather is waterproof, wear-resistant and impact-resistant
- The leather is filled with EPE cotton

BOXER HAND TARGET

LIVEPRO hand target is made of durable leather, which is resistant to blows, and durable. The curved design is ergonomic and fits the hands, bringing users a comfortable experience.

ITEM LP8604

- The back is high-quality PU material, which is wear-resistant and anti-tear and has strong resistance to beating
- The middle EPE cotton thickened is 5cm, which is effective to disperse the impact
- Size: 24×18×5cm

BOXING FOOT TARGET

This is a product designed specifically for boxing training, with high-quality durable PVC material, which is waterproof and wear-resistant and comfortable to the touch. It is filled with environmental protection EPE material in the middle with strong cushioning force and high shock resistance, which plays a good protection role in the training of the foot and maximizes the comfort and balance, which is suitable for boxing training, etc.

ITEM LP8603

- The back is high-quality PU material, which is wear-resistant and anti-tear, and has high impact resistance
- PU material is breathable, dry and comfortable to wear
- The middle EPE cotton thickened is 11cm, which effectively disperses the impact
- Size: 41×21×11cm

MOUTH GUARD

Made of soft and flexible EVA, it is designed to withstand impact and protect teeth and gums from injury during training or competition. It is designed to fit snugly in the mouth to precisely match teeth and gums.

ITEM LP8609

- Made of durable, soft and flexible food-grade EVA material
- Perfect fit for your mouth and teeth
- Easy to use
- Size: 5.7×4.7×2cm

HAND STRAP

Made of high-quality tweed material, it provides breathability and security. hand strap helps protect the bones and tendons of the hand, and wraps easily with Velcro closures, available in black and red, black and yellow, and black and white.

- Made of high quality tweed
- Efficient protection
- Comfortable to wear
- Multiple colors
- Size: 300×5cm

INSTEP PROTECTOR

Available in blue and black, With high-quality mesh fabric, The back of the foot is filled with EVA lining, which is elastic, lightweight and can form a buffer against impact and perfectly protect the back of the foot.

ITEM LP8625

- Made of high-quality cotton
- Efficient protection
- Comfortable to wear
- Two specifications
- Size: Large:33×11.5cm Trumpet:32×10cm

NEW FOR 2023

BOXING

LIVEPRO AQUA BOXING BAG

Livepro aqua boxing bag is the ideal training equipment for every boxer. The water bag made of PVC material is filled with water which better imitates the human touch than sand bags, and can automatically return to elasticity for more natural exercises. In addition, the water bag filled with water can better absorb fist strikes, and effectively protect the hand joints in the intense training.

- The water bag imitates the real touch of the human body and can restore the elastic structure during training, allowing for a more natural practice
- Water bag filled with water can more effectively absorb the force of fist strikes and better protect the joints of the hand
- High-quality PVC material is durable and anti-aging, has strong bending strength and impact toughness, and is resistant to hitting

Include:

- Aqua Punching Bag
- Shackle
- Hose-Filling Nozzle
- Extra Stopper

Specifications:

- Filled Weight: 40 kgs.
- Size: 58×45 (cm)

- Ball weight: 4kg
- Accessory weight: 1kg

ITEM LP8606

PUNCHING BAG

Boxing sandbag made of thickened high-quality PVC fabric can enhance the hitting resistance, the internal is uniformly filled with cotton rubber particles. Double rows of sewing thread are reinforced on the sandbag to ensure its high quality and safety, which is very suitable for use in gyms.

ITEM LP8602

- Filled with cotton inserted rubber particles
- Made of thickened PVC material
- Thicker double-row stitching, is solid and safer
- Sturdy and durable structure

- Weight: 45kg
- Size: 150L×35W×35H(cm).

BOXING STAND

- Hard to deformation
- The bottom can be filled with water to add weight
- More silent hit
- Hit position marked

- Weight: 15kg
- Size: 70×180cm
- Material: PVC/EPE/HDPE

ITEM LP8607

BOXING TARGET

- High-density plastic base that can be filled with water to add weight for maximum stability
- Top PU shock-absorbing ball is for long-lasting durability
- Adjust the corresponding height between 160-220cm

- Weight: 11kg
- Size: 50×160-220cm
- Material: PE/Steel

ITEM LP8608

BOXING BAG HOOK

- Made of pure steel
- strong and sturdy
- Safe and reliable
- 360 degree omnidirectional rotation

ITEM LP8623

BOXING BAG HOOK

The triangular bracket design is safe and stable, and effectively cushions the shock. Double-layer welding, firm and safe.

- Size: 82.2L×102.05W×51.64H(cm).

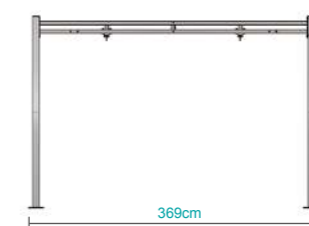

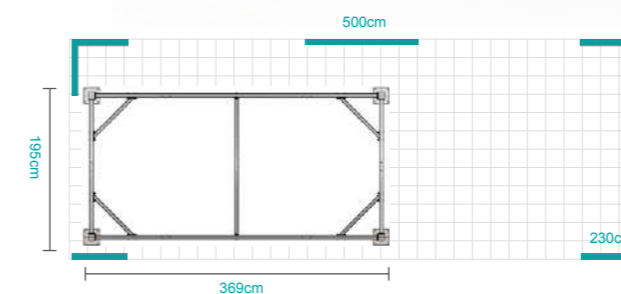

ITEM LP8622

LIVEPRO BAG RACK

Comprehensive solution for multiplayer boxing training
Greatly improved space utilization
Can be customized freely according to the size of the venue
Can hold 6 people for boxing training at the same time

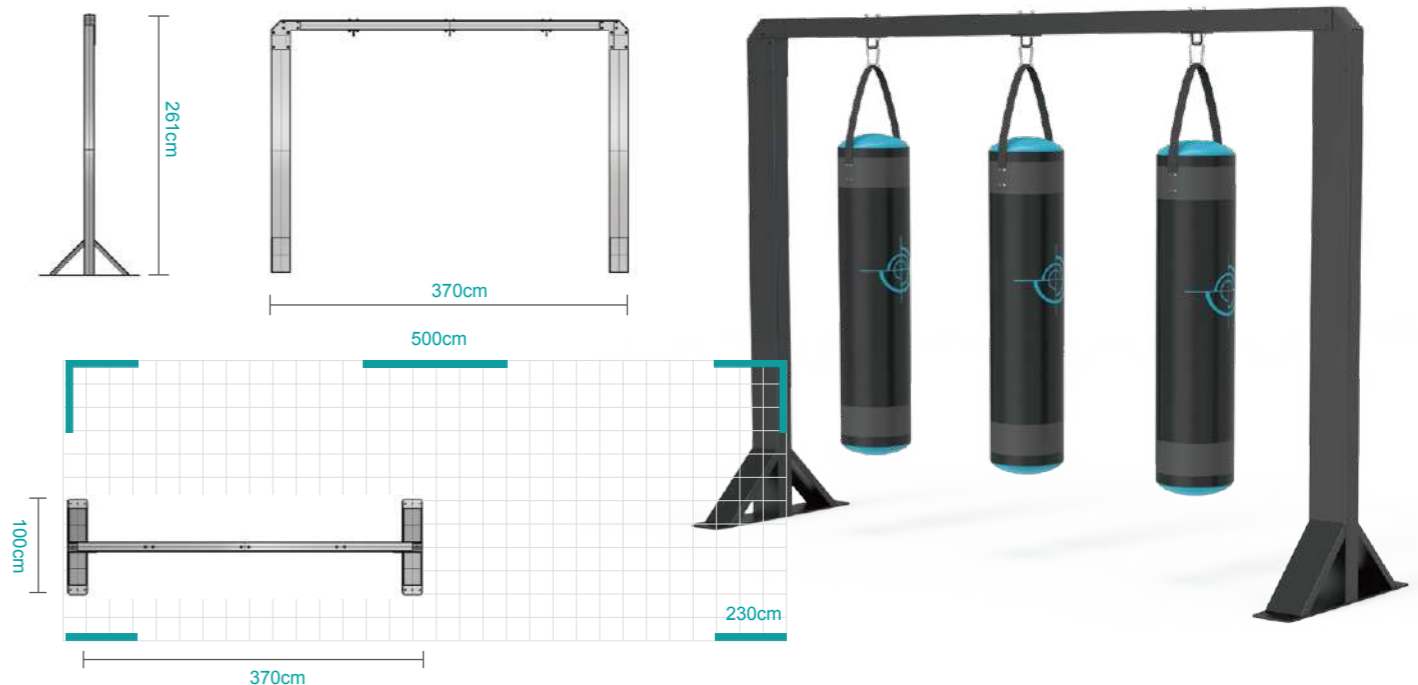

- Mat: steel
- Tube size: 80×80×3mm
- Product Size: 369×195×250cm

The Standing Bag Rack is a professional grade heavy bag station for your gym that is built to withstand big kicks and hard hits. As a floor mounted rack, it is also especially well-suited for gyms and studios that cannot mount bag racks to the walls. It's base comes with anchors to mount it directly into concrete subfloors, leaving the function and finish of your walls and ceilings protected while also minimizing use related noise.

PE SHOCK PAD FOR TURF FLOORING

LP8390

Artificial turf PE Shock Pad is resilient pad for artificial turf to absorb the impact of synthetic material, with shock absorption, drainage and damping performance, it makes the impact of the stadium to be absorbed more than 55%, increase the elasticity and shock absorption performance of football field turf, make the artificial grass more close to natural grass.

- Door width: 2M
- Thickness: 10mm
- Material: PE

52500 DENSITY HIGH-END TURF

LP8280

Customized full-curve high-end turf is a special high-pound full-curve grass yarn with a density of 52500 Densities. The double-layer bottom structure of the grass yarn is more durable and durable. Grass thread is 13mm long, comfortable to the foot, durable and durable. This durable lawn has been extensively tested and designed. Dedicated to fitness and indoor sports venues, making the training area more lively and interesting.

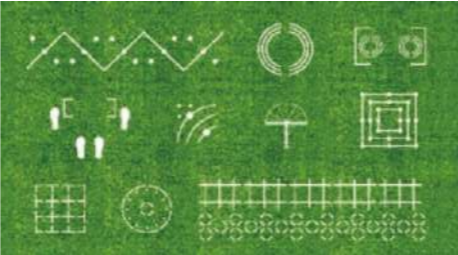

- Door width: 2M
- Thickness: 13mm

Pure colored grass

Runway grass

Custom Pattern Grass

63000 DENSITY HIGH-DENSITY LAWN

LP8391

The new integrated knitted curved grass is a 63000 needle high-density turf. This high-density lawn has a thickness of 15mm, and can also be equipped with a 5mm thick PU bottom. The integrated knitting process not only ensures the richness of the shape, but also ensures the firmness of the straw yarn, making it very durable. An optional 5mm thick PU elastic underlay enhances cushioning performance. Dedicated to fitness and indoor sports venues, making the training area more lively and interesting.

- Standard door width: 2m
- Extremely high density and durability
- Designed for high performance areas

Thickness	Door width	Weight
15mm	2m	4kg/m²
15mm+5mm (PU Below)	2m	5kg/m²

84000 DENSITY HIGH-DENSITY TUFTED TURF

LP8392

84000 Density high-density tufted turf with a height of 18mm. Higher density turfs are stronger and more durable, made of UV resistant monofilament crimped fibers. It can be used for a long time in outdoor environments and is not prone to corrosion and wear.

Color	Double Green
Door width	3.66m/4m
weight	2.67kg/m²
Drain hole	2mm, water permeability: ≥ 30 liters/minute/m² (without filler)
Grass planting height	16mm

56700 DENSITY HIGH-DENSITY TUFTED TURF

LP8393

56700 Density high-density tufted turf with a height of 18mm. Higher density turfs are stronger and more durable, made of UV resistant monofilament crimped fibers. It can be used for a long time in outdoor environments and is not prone to corrosion and wear.

Color	Double Green
Door width	3.66m/4m
weight	2.22kg/ m²
Drain hole	2mm, water permeability: ≥ 30 liters/minute/m² (without filler)
Grass planting height	16mm

22050 DENSITY TURF

LP8394

This durable artificial turf has been tested and designed for widespread use in sports and fitness activities. Grass fiber is divided into straight grass and curved grass, both of which are strong and durable UV resistant fibers. Not susceptible to the impact of temperature and geography, reducing the risk of injury during sports.

Material	Straight grass: 100% PE polyethylene, UV resistant monofilament fiber Curly grass: 100% PP polypropylene, UV resistant monofilament crimp fiber
Door width	3.66m/4m
weight	2.75kg/ m²
Water permeability	4mm, water permeability: ≥ 60 liters/minute/m² (without filler)
Grass planting height	25mm

10080 DENSITY TURF

LP8395

This type of artificial turf is mostly used in football fields or multi-function sports fields. Made of UV resistant monofilament crimped fiber and PE, the lawn has a good elasticity that can effectively alleviate the impact of falls and reduce injuries.

Material	100% PE polyethylene, UV resistant monofilament crimp fiber
Door width	3.66m/4m
weight	2.55kg/m²
Water permeability	No drilling, water permeability: ≥ 60 liters/minute/m²(without filler)
Grass planting height	60tmm

GAINS is LIVEPRO's new storage solution brand. Nowadays, sports spaces come in various sizes and designs, but there is a common goal - to effectively maximize space utilization and exercise functions. Equipment placement, safety, and space saving are important. The GAIN [S] system can reserve storage space while activating other systems. The Gain [S] storage and suspension system adopts a modular design, which is very suitable for use in group studios, dynamic training areas, and private education stretching areas.

Higher strength

The integration of each frame and storage rack is carefully designed. High quality steel is selected, and automobile painting process is adopted, which is highly rustproof and corrosion resistant. It can provide significant value in terms of function, finish, or service life.

Easy to install

Free installation, unrestricted connection. It supports rapid transition from one sports device to another.

Intelligent storage

Each storage bay is optimized to accommodate larger devices with a smaller footprint. The storage rack allows for more training extensions and has gained more training functionality.

GAINS is LIVEPRO's new storage solution brand. Nowadays, sports spaces come in various sizes and designs, but there is a common goal - to effectively maximize space utilization and exercise functions. Equipment placement, safety, and space saving are important. The GAIN [S] system can reserve storage space while activating other systems. The Gain [S] storage and suspension system adopts a modular design, which is very suitable for use in group studios, dynamic training areas, and private education stretching areas.
